

This architectural rendering shows a proposed new building complex. The main structure is a long, low building with a light-colored facade and a central tower. To the right, there is a red brick building. The complex is set against a clear blue sky and a paved area in the foreground.

An architectural rendering of a proposed new building for the University of North Carolina at Charlotte. The building is a long, modern structure with a central entrance and several wings. It is surrounded by a landscaped area with trees and a paved plaza. The rendering is presented in a wide, horizontal format.

This architectural elevation rendering shows the proposed building design. The structure is a long, low-profile building composed of several interconnected volumes. On the left, there is a prominent red volume. This is followed by a series of white volumes of varying heights and widths. A small yellow volume is visible in the middle section. The building is set against a clear blue sky. In the foreground, a row of dark green trees is planted along the base of the building, and a light-colored paved area is visible at the bottom of the frame.
